

NGC Recycled Sculpture 2024 Winners

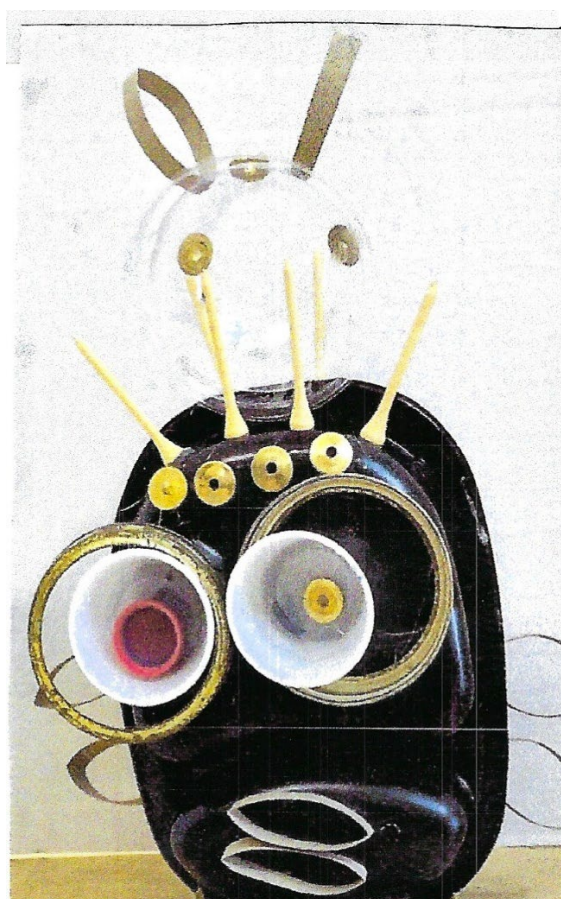

1st place 4th Grade

Because this was a garden club entry, I decided to use a flower for my project. Materials used were scrap material in my home and community.: egg carton, aluminum foil, candy wrappers, paper towel roll and plastic tubing.

1st place 5th Grade

I used an empty soda bottle and a yogurts container to create the armature of my reindeer. Giant wooden popsicle sticks became the legs. I applied a layer of brown paper towels over the Entire deer, once dry I brushed paint all over to make it look like fur. I did glue real fur in the neck and tail.

6th Grade 1st place

A Squalid – anything can be art

Materials used: tray, sticks, cup tops, soda tops and cup bottoms

7th Grade 1st place winner

Mother Nature

Gaia is the Greek Goddess of nature and Earth. She is surrounded by critters and insects. She is telling children of the world to take care of the planet.

8th Grade 1st Place

A camera that can hang from your neck and also has a tri-pod. Made of card board tape glue and pink ribbon. Note the photo in the camera's lens.
