

National Garden Clubs, Inc.
GARDENING SCHOOL

Series 19 – Course 3
August 3 & 4, 2026

San Antonio Garden Center
3310 N. New Braunfels
San Antonio, TX 78209
830-837-5262

Open to Everyone!

Gardening School Courses are open to everyone, regardless of National Garden Club, Inc. membership. Each of the 4 courses has an optional exam. **NGC members wishing to apply to be NGC Gardening Consultants must take all four courses and pass each exam.**

Non-members fulfilling the above requirements may apply to be Consultants upon joining an NGC affiliated club within one calendar year of the completion date of the 4th course.

To take advantage of this opportunity, fill out the registration form on the reverse side of this brochure and send it with your check in the amount of \$150.00 made out to:

TGC, Inc. Garden School
Memo line: GS S19-C3

Please Note
Course #4 is planned for
February 1&2, 2027

*Helping Members become accomplished
horticulturists.*

The NGC Gardening School Courses are designed to provide educational instruction to those interested in gardening, horticulture and related subjects.

The school consists of a series of four courses, scheduled for two days of instruction followed by an **OPEN BOOK** examination. Courses cover all aspects of growing – from understanding soil structure to pruning techniques, plant cultivation and identification, etc. Topics include basic botany, soils, growing annuals, perennials, trees and shrubs, fruits and vegetables, lawns, pests and diseases of plants, and selected subjects of interest.

The courses are intended primarily for garden club members, but they are also open to the general public, requiring only the payment of a nominal fee. NGC affiliated Garden Club members completing the series of four courses are awarded the designation of NGC Gardening Consultant. A non-member student who has successfully completed the four courses may apply for Consultant Certification upon joining a garden club affiliated with NGC within one year after completing the series. Additional topics and areas of interest that may be covered are subjects such as Reconciliation Ecology (the science of inventing, establishing and maintaining new habitats in places where people live, work, and play), and creating backyard habitats to help endangered species such as pollinators and amphibians.
